**REVIEW – REVIEW – II CHECKLIST : DESIGN**

**25 Marks**

| DESIGN                                                                                                            |   |
|-------------------------------------------------------------------------------------------------------------------|---|
| 1. Are requirements reflected in the system architecture?                                                         | Y |
| 2. Does the design support both project (product) and project goals?                                              | N |
| 3. Does the design address all the issues from the requirements?                                                  | Y |
| 4. Is effective modularity achieved and modules are functionally independent?                                     | N |
| 5. Are structural diagrams (Class, Object, etc.) well defined and understood?                                     | Y |
| 6. Are all class associations clearly defined and understood? (Is it clear which classes provide which services)? | N |
| 7. Are the classes in the class diagram clear? (What they represent in the architecture design document?)         | Y |
| 8. Is inheritance appropriately used?                                                                             | N |
| 9. Are the multiplicities in the use case diagram depicted in the class diagram?                                  | Y |
| 10. Are behavioral diagrams (use case, sequence, activity, etc.) well defined and understood?                     | N |
| 11. Is aggregation/containment (if used) clearly defined and understood?                                          | Y |
| 12. Does each case have clearly defined actors and input/output?                                                  |   |
| 13. Is all concurrent processing (if used) clearly understood and reflected in the sequence diagrams?             | Y |
| 14. Are all objects used in sequence diagram?                                                                     | N |
| 15. Does the sequence diagram match class diagram?                                                                | Y |
| 16. Are the symbols used in all diagrams correspond to UML standards?                                             | N |
